Course No.: 8911  
Course Type : Lecture  
Weekly Hours : 2  
Credit: 3.5

Course Requirements : Final Exam

Language: English

Prerequisites

Prerequisite: 8910 - Introduction To Statistics A
Course Description

The course will focus on basic concepts of Statistical Inference and the ways researchers generalize findings from a specific sample to the population from which this sample is drawn. Students will learn to perform and analyze simple statistical tests, such as Chi Square test, Z test, T test, and one-way analysis of variance.
