AI Policy in the Course

Allowing free use of AI, according to the university's policy

The use of Generative Artificial Intelligence (GAI) tools can offer significant educational value. However, it is important to set clear rules and expectations for their use in assignments and exams.

When using GAI tools in assignments or exams, students must report such use within the submission, specifying how the tools were used – for example, the type of AI tool used or the content of the prompts.

The use of GAI tools in violation of these university guidelines, may be considered a disciplinary offense.
