# **Fair Value Forum:**

SOX/ITGC Automation - Use cases

# fiver. AICL

June 2023

### **Our Mission**

#### AudITech's mission is to transform the way audit is done

We aim for automating all the manual, repetitive and error-prone processes involved in preparing the financial statements.

We focus on **Internal Audit Controls**, a **mandatory part** of the Financial Statements. We start from ITGCs, which are controls that apply to IT systems and aim to **ensure the proper development and implementation** of applications, as well as the **integrity of programs, data files, and computer operations** while increasing organizational **IT security**.

### **How it Works**

#### AudITech Solution Concept is an E2E ITGC Automation

We extract all ITGC target data, process it, produce a report for the management to approve and build the required auditor documentation - all through a single ITGC dashboard

#### **Customer Case Study**

#### Automating ITGC Controls for AwS Microservices (Self-developed system)

## Background

Fiverr is a global marketplace that connects freelancers and businesses for digital services.

NYSE listed company with over **4.3 million active buyers** and more than **780** employees

ITGC Scope covers **13 in-scope systems** and multiple supporting systems, including the marketplace SaaS platform

Therefore, ITGC audit is a <u>complex project</u>, with <u>high impact on financial</u> <u>statements</u>, and requires <u>significant amount of resources</u> (Finance, Business Technologies, R&D, Auditors and Advisors)

### Goals

Improving the **effectiveness** of IT controls

Improving **audit timeline** & reducing **resource** utilization

How to **rely** on automated audit

How audit procedures should be in

**100% of population testings**?

Shift in state of mind: "One-time event" to "Ongoing monitoring"?

Only full cover of IT controls by **testing** <u>100%</u> of the population during <u>100%</u> of the time, will allow us to achieve our goals.

### Results

Fiverr's Change Management controls testing was **reduced by 80%** in the first year and provided **100% cover** of the tested population.

	Traditional Audit <u>FY 2021</u>	Automated Audit <u>FY 2022</u>
Scooping relevant change management population	5 Hours	5 Hours
Interim testing: Extract, analyze and document 25 Samples	20 Hours	0.5 Hours
Year-end testing: Extract, analyze and document 25 Samples	20 Hours	0.5 Hours
High-Risk specific testing: Extract, analyze and document 10 Samples	5 Hours	-
Analyze and communicate findings	5 Hours	1 Hours
Automation substantive procedures	-	5 Hours
<u>Total Efforts</u>	55 Hours	0%) <u>12 Hours</u> 7%
Population examined	50 out of 1637 ( <u>3%</u> )	1808 out of 1808 <u>(100%</u> )

### **Customer Case Study**

#### Automating ITGC Controls for SAP ECC, Salesforce and Active Directory

## Background

NYSE listed company with over **100 entities worldwide** and **more than 12,000 employees** 

The company ITGC RACM has more than **250 controls** in multiple sites worldwide.

#### Goals

Improving the **effectiveness** of IT controls

How to automate processes involving **multiple IT systems**?

**Proof**ofconceptforautomationITGC audit for thewholeICL Group

Howtoimprovecontrolseffectivenessfor a company withsolidauditandoperationalprocesses?

### Results

The first entity was successfully automated, and the journey toward ITGC automation begins
