Ms. Gal Borsuk
Academic Coordinator

A great deal of effort has been expended in preparing this handbook, in order to ensure that its content is complete and accurate. However, changes and alterations to the information are possible. The IDC Herzliya Academic Authorities may cancel, alter or add courses and/or specialization programs, and generate changes in the times of lectures or in the assigned lecturer. Such changes will be published over the course of the year by various means, such as the online handbook on the IDC Herzliya website, and will apply to all IDC Herzliya students, including students of the Raphael Recanati International School, unless specified otherwise.

Introduction

B.A in Business Administration (pp. 5-16)

Specialization in Marketing and Entrepreneurship

Head of the Program: Dr. Talia Rymon

The specialization in marketing provides extensive knowledge on all the diverse marketing activities, acquaintance with and understanding of the modern marketing in the technological era: customized marketing, data-driven marketing, with emphasis on long-term relationship. The specialization courses are designed to provide theoretical and practical knowledge, and enable hands-on experience through real-world projects, case study analyses, company visits and guest lectures of leading marketing and business managers. The specialization courses include up-to-date courses such as digital marketing, customer management in the information era, marketing in the sports industry, trends analysis, retail marketing and more. During their third year of study, students work on a year long marketing project and prepare a marketing plan for leading firms, start-ups and organizations.

This Specialization program also includes unique seminars for honor students conducted in close cooperation with L'Oréal and Mercedes, These seminars are taught in Hebrew, but the projects and presentations can be submitted in English.

The specialization includes a cluster in entrepreneurship, which provides a set of practical tools, for those who are asking to establish new start-ups or businesses or to lead projects in organizations they will work in.

The graduates of this specialization will be able to begin a career in the fields of marketing, strategy and communications and join companies and organizations as marketing managers, marcomm managers, digital managers, product managers or brand managers. Furthermore, the graduates of this program will be able to join companies that provide marketing services such as advertising, public relations, digital marketing, marketing consultancy services and marketing research.

Specialization in Finance and Entrepreneurship

Head of the Program: Prof. Jacob Boudukh

The specialization in finance prepares students to succeed in lucrative positions at financial institutions, such as banks and insurance companies, as well as in the financial departments of corporations and consulting firms.

The growing globalization of the markets and stock exchanges, as well as the multitude of new and sophisticated financial tools, has compelled companies to use high-level financial tools and approaches. Without the use of the most advanced tools for pricing assets, raising capital, selecting projects for investment, managing risk, and undertaking mergers and acquisitions, companies cannot survive in the competitive market.

The specialization includes a cluster in entrepreneurship, which provides a set of practical tools, for those who are asking to establish new start-ups or businesses or to lead projects in organizations they will work in.

The program balances between theoretical foundations and practical courses, and includes courses on corporate financing, asset valuation and derivatives, financial risk management and investment portfolio management. Students apply all this in a seminar in which they complete a consulting project, either evaluating a company or researching performance in the capital market. In addition to preparing students for successful careers, the specialization in finance teaches them how to obtain and manage sources of capital.

Specialization in Digital Innovation

Dr. David Movshovitz, Head

The program in digital innovation provides students with wide-range, in-depth knowledge of the various aspects of digital transformation taking place in the business world, as well as the new business opportunities created by this transformation.

The specialization courses provide the students with theoretical principles as well as practical skills. Students implement what they have learned in a final project where they develop a complete business plan to create a digital business from the idea phase, including market analysis, requirement specification, architecture, R&D plan, marketing plan, and financial analysis.

Our graduates acquire the skills and knowledge to develop careers in the digital transformation departments that are being established by many companies, or in high-tech companies where they serve as business development managers, product managers, project managers, sales engineers, or account executives.

Introduction

Double Major B.A in Business Administration and Economics (pp. 18-23)

In today's competitive environment, students who possess specialized and interdisciplinary knowledge will command significant advantage in the job market. Students in the Economics and Business Administration program will emerge with broad background knowledge and, at the same time, develop areas of specific expertise.

Business managers who possess a deep understanding of the factors that shape the domestic and global economies and economists endowed with managerial skills will be future leaders in business.

The program combines the core fundamentals of economics and management; in addition, it equips budding entrepreneurs with practical tools to realize their full potential. The program undergoes frequent revision to remain relevant in a dynamic and ever-changing economic and business environment. Students will learn how to analyze and approach the most current economic issues in Israel (the gas outline, housing and food prices, etc.). Outstanding students will be offered roles in the public and private sectors during the school year. The curriculum encourages development of the theoretical and practical tools that are required for management excellence in dynamic markets. The program is taught by professors and researchers who are leaders in their fields and offers opportunities to meet and interact with eminent public figures in the modern economics and business world.

The program will provide a broad background of the problems and challenges faced by modern-day economists and business managers. A multidisciplinary education will position graduates of the program to pursue higher education and career opportunities in a diverse number of fields

Students will build a competitive skill set and be well qualified for jobs in the public and private sectors.

The program offers a variety of elective courses in subjects such as capital markets, entrepreneurship, marketing and strategy. These courses will expand students' theoretical knowledge base and provide practical tools in key management topics.
