

## **ENTRY TO ISRAEL DURING COVID<sup>1</sup>**

Dear RRIS students,

### **For those who are currently abroad:**

*Please see detailed & updated official regulations and instructions towards your arrival: [here](#) and [here](#).*

In general, As of March 1, 2022, **tourists and student visa holders of all ages will be permitted to enter Israel, vaccinated and unvaccinated alike**, subject to two negative PCR test results, before boarding the flight and after landing (see detailed information in the above-mentioned links).

Currently, no special additional entry permit is required in order to enter.

Basically:

1. Do a PCR test within 72 hours before your flight (unless you have recovered in Israel during the last 3 months)
2. Fill out and submit online the "entry statement form" within 48 hours before your flight
3. Do a PCR test at the airport after you land – registration and payment should be done in advance through the [entry statement form](#) filled out before your flight.
4. Short isolation for anyone entering Israel – 24 hours or until you receive negative PCR test results from the airport, whichever is earlier.
5. If you were found positive after landing, see [here](#)

### **After you land:**

1. Make sure you are familiar with [Ministry of Health regulations](#) regarding quarantine.
2. You should arrive directly to your place of quarantine, **no stops** on the way
3. Note that authorities may call / visit your reported place of quarantine during this time to check your presence there.

### **Entry to campus - For those who have arrived in Israel and finished quarantine:**

Since the "green pass" has been cancelled, there is no longer a requirement for "green pass" in order to enter campus.

---

<sup>1</sup> All regulations are subject to the policy of the Israeli Ministry of Health, and may change at all times.

## **Booster vaccinations in Israel**

COVID vaccinations are normally available only at public Israeli health service provider locations, and for holders of Israeli health insurance only (including Reichman University health insurance).

For people with non-Israeli insurance, there are very few vaccination stations available throughout the country, in limited locations and opening hours, which change daily according to Ministry of Health decisions.

[To the list of vaccination centers](#) (information published in Hebrew only).

We wish you lots of health, and a successful academic year!

The Raphael Recanati International School team
