

Efi Arazi School of Computer Science

B.Sc. in Computer Science

Prof. Yacov Hel-Or
Dean

Prof. Shay Mozes
Deputy Dean

Prof. Tal Moran
Academic Counselor

Ms. Shlomit Stern (Hazan)
Head of Student Administration

Ms. Efrat Tausi
Executive Administrator

Ms. Miriam Perl
Academic Coordinator

The program of the Double Major in B.A in Entrepreneurship and B.Sc. in Computer Science is available in the Entrepreneurship School Printed Handbook

A great deal of effort has been expended in preparing this handbook, in order to ensure that its content is complete and accurate. However, changes and alterations to the information are possible. The Reichman University Academic Authorities may cancel, alter or add courses and/or specialization programs, and generate changes in the times of lectures or in the assigned lecturer. Such changes will be published over the course of the year by various means, such as the online handbook on the university website, and will apply to all Reichman University students, including students of the Raphael Recanati International School, unless specified otherwise.

Introduction

The curriculum of the B.Sc. undergraduate degree in Computer Science includes:

- 17 mandatory and elective courses in Computer Science
- 7 mandatory courses in Mathematics
- 2 English courses
- 2 Business Administration courses
- 4 general elective courses

First Year

First-year students are required to take basic courses in Computer Science, Mathematics, and English. This year is dedicated to mandatory courses only, comprising 48 credits (including English courses).

Second Year

Second-year students are required to take mandatory courses in Computer Science, as well as a Business Administration. Students are also required to take 2 Computer Science elective course. This year comprises 41 credits.

As part of the mandatory courses in computer science this year, the student must choose one of two mandatory courses:

- Digital Systems (3955)
- Digital Architectures – (79) this lesson has a recitatio

Third year

Third-year students are required to complete their mandatory Computer Science and English requirements and take 4 additional Computer Science elective courses. This year comprises 29 credits.

CS Important Information

- To pass the courses you must get at least 60 in the final exam.
- In addition to the above, each student is required to take general elective courses comprising 8 credits throughout their studies, to expand their general knowledge.

Students may choose general elective courses out of all courses offered on campus, provided that the courses are available and that the students meet their prerequisites. Registration for cross-campus courses will be done by applying to the Student Administration during the registration period.

As part of the requirements in the CS degree, 2nd and 3rd year students must choose a total of 6 CS elective courses from the list of CS electives.

Two of these electives must be from the category of theoretical elective courses, and the remaining courses, from the practical elective course.

- Within the **elective computer science courses** you may choose a guided field project, either a personal project or a lab project.
You cannot execute more than one guided field project. If a student did more than one guided field project, one of them will be added to the extra courses and won't be listed on the main transcripts of grades. The Media Innovation Lab (Milab) and InGame are considered guided field projects.

- As part of computer science elective courses, 3rd year students may register to MSc elective courses. You can find the list of M.Sc. courses is updated in the student handbook.
A student who has completed one or more MSc elective courses may request, at the end of his/her degree, to convert only one of them into a binary grade.

Academic English Requirements

Every student must fulfill the academic English requirements until the end of the second year of studying (in the three-year program) and until the end of the third year of studying (in the four-year program).

A student who doesn't achieve the required exemption on time won't be able to finish the degree and will have to add another year.

In order to get an exemption the student must provide the required grade in either the Amir, the Amiram, TOEFL, Duolingo ,the Psychometric or the SAT test or pass the Computer Science English Advanced 2 course.

Overall, the B.Sc. students are required to complete 126

Program of Studies

First Year B.Sc in Computer Science

Course Code	Course Name	Lecture Hours	Recitation Hours	Total Credit Points	Prerequisites
Fall Semester Courses					
52	Calculus I	4	2	6	
54	Linear Algebra I	4	2	6	
56	Discrete Mathematics	3	2	5	
417	Introduction to Computer Science	4	2	6	
110	English for CS Advanced 2	3		2	
Spring Semester Courses					
53	Calculus II	3	2	5	Calculus I
55	Linear Algebra II	3	2	5	Linear Algebra I
59	Data Structures	3	2	5	Int. to CS
69	Logic and Set Theory	3	2	5	Discrete Math
3144	System Programming in C	3	1	3	Intro. to CS Data Structures (simultaneously)
110	English for CS Advanced 2	3		2	
Total Credits				48	

In addition to the mandatory courses, all CS students are required to take 8 credits of General Elective Courses during the course of their studies. The courses can be chosen out of all courses offered on campus, provided that the courses are available and that the students meet their prerequisites.

Second Year B.Sc in Computer Science

Course Code	Course Name	Lecture Hours	Recitation Hours	Total Credit Points	Prerequisites
-------------	-------------	---------------	------------------	---------------------	---------------

Fall Semester Courses

77	Algorithms	3	2	5	Discrete Math Data Structures Logic and Set Theory
109	Introduction To Probability	3	2	4	Discrete Math Calculus I
3030	Advanced Programming	3	1	4	Int. to CS

Spring Semester Courses

3699	Computational Models	3	2	4	Discrete Math Logic and Set Theory Algorithms
84	Operating Systems	3	1	4	Data Structures Digital Architectures System Programming in C
3141	Machine Learning from Data	3	2	4	Calculus I, II Algebra I, II Algorithms Int. to Probability

Computer structure courses – 4 credits

You must choose one of the following mandatory courses. Registration will take place during the online registration period.

Please note, the Digital Architectures course has a recitation, to complete your registration to this course you must register for the recitation group during your online registration.

Course Code	Course Name	Lecture Hours	Recitation Hours	Total Credit Points	Prerequisites
-------------	-------------	---------------	------------------	---------------------	---------------

Fall Semester Courses

79	Digital Architectures	3	2	4	Int. to CS, Discrete Mathematics
3955	Digital Systems	3		4	Int. to CS, Discrete Mathematics

Business Administration courses

As part of the Computer Science program, all students are required to take two Business Administration courses.

Course Code	Course Name	Lecture Hours	Recitation Hours	Total Credit Points	Prerequisites
-------------	-------------	---------------	------------------	---------------------	---------------

Fall Semester Courses

89	Fundamentals of Finance	3		3	
152	Introduction to Microeconomics	3		3	

Computer Science Elective Courses¹

- Students in their 2nd and 3rd year, must choose a total of 18 credits from theoretical and practical elective courses categories. At least 6 credits must be from the theoretical elective courses category. **2nd year students** can choose a total of 6 credits from both categories together.
- Prerequisites for each Computer Science elective course are passing grades in all of the first year mandatory CS and Mathematics courses, except for Calculus II and Algebra II in practical category. This is in addition to the specific prerequisites of each course, as detailed below:

Fall Semester Courses

3354	3D Animation with Unreal Engine	3		3	Theoretical course
------	---------------------------------	---	--	---	--------------------

Spring Semester Courses

3125	Object Oriented Programming with C# and .NET	3		3	Practical course Middle Semester Exam (date will be published)
3157	Internet of Things (IoT): Hands On	3		3	Practical course
3961	Cloud Computing and Software Engineering	3		3	Practical course Operating Systems

Total Credits**44**

In addition to the mandatory courses, all CS students are required to take 8 credits of General Elective Courses during the course of their studies. The courses can be chosen out of all courses offered on campus, provided that the courses are available and that the students meet their prerequisites.

¹ The CS elective courses are offered in English. Students are welcome to choose a course offered in Hebrew, as detailed in the handbook of the Hebrew program.

Third Year B.Sc in Computer Science

Course Code	Course Name	Lecture Hours	Recitation Hours	Total Credit Points	Prerequisites
-------------	-------------	---------------	------------------	---------------------	---------------

Fall Semester Courses

592	Computer Networks	3	1	4	Algorithms Operating Systems
644	Computability and Complexity	3	1	4	Algorithms Automata And Formal Languages

Spring Semester Courses

80	Functional and Logic Programming	3	1	4	Int. to CS Data Structures
164	Introduction to Computer Graphics *	3	1	4	Algorithms
282	English for CS – Presentations ♦	3		1	

* This course is an online course, except for the first and last sessions which will require physical attendance in class – on the days and times stated in the schedule

Computer Science Elective Courses¹

3rd year students are required to choose three Computer Science elective courses.

Prerequisites for each Computer Science elective course are a passing grade in all of the first year mandatory courses in CS and Mathematics, in addition to the specific prerequisites of each course, as detailed below:

Fall Semester Courses

3119	Guided Project ▲■ Faculty Staff	3	3	1 st year courses and Guidance approval
3354	3D Animation with Unreal Engine	3	3	
3169	Artificial intelligence and Morality	3	3	
3598	Deep Learning and Image Understanding ●●●	3	3	Machine Learning from Data
3620	Statistics and Data Analysis ●●●	3	1	4 Introduction To Probability
3626	Blockchain and Cryptocurrency ●●	3	3	

Spring Semester Courses

3125	Object Oriented Programming with C# and .NET	3	3	Middle Semester Exam (date will be published)
3128	Build your Own Computer	3	3	Digital Architectures
3157	Internet of Things (IoT): Hands On	3	3	
3327	Numerical Optimization with Python ●	3	3	
3523	Natural Language Processing ●●	3	3	Algorithms Machine Learning from Data

¹ The CS elective courses are offered in English. Students are welcome to choose a course offered in Hebrew, as detailed in the handbook of the Hebrew program.

3959	Text Retrieval and Search Engines ●●	3		3	Algebra 1+2 Introduction To Probability Introduction to CS
3676	Advanced Statistics ●●	3		3	Calculus II Linear Algebra Introduction To Probability Register only with lecturer approval.
3945	Advanced Machine Learning ●●● Dr. Leon Anavy	3	1	3	Machine Learning from Data
3961	Cloud Computing and Software Engineering	3		3	Operating Systems (in parallel or completed)
Total Credits				26	

- ◆ **Intensive course. The specific dates will be published on the course website.**
- ▲ For 3rd year students only. The course is on a personal guidance basis and is spread over the entire academic year.
- ▣ Please note: a student can only register to **one guided project during his/her degree.** ("Ingame Workshop" (3134) and "Guided Field Project-Media Innovation Lab" (3120) Are considered guided projects)
- This course is part of the M.Sc. curriculum, and is open for B.Sc. students.
- This course is part of the M.Sc. curriculum, and is open for B.Sc. students with a total GPA of 75 and above.
- This course is part of the M.Sc. curriculum, and is open for B.Sc. students with a total GPA of 80 and above.

In addition to the mandatory courses, all CS students are required to take 8 credits of General Elective Courses during the course of their studies. The courses can be chosen out of all courses offered on campus, provided that the courses are available and that the students meet their prerequisites.

Exam Schedule

The dates of the examinations can be found on the university website under Students > Student Information > Course Catalog, Student Regulations and Syllabus > Search Exams

A personal examinations schedule is published at the Student's Information website (My RUNI).
