Specialization in Diplomacy and Conflict Studies
Head of specialization: Dr. Oded Brosh

About the Program
The specialization combines theory and practice of contemporary diplomacy and the study of conflict. Students will gain an understanding of how conflicts and wars develop and how they may be managed or resolved, strategically, diplomatically or informally. By gaining knowledge and tools, students will be equipped to deal with international conflicts and problems in today's globalized world. In addition to the psychological, cultural and legal aspects of conflict, the program emphasizes the acquisition of tools for dealing with conflict: negotiation, mediation, public diplomacy, post-conflict reconstruction, and track-two engagement. International intervention, third party involvement and peacekeeping will also be examined, with particular respect for their integration into the strategies of governmental and non-governmental bodies. Additional emphasis on Contemporary Middle East, aims to explore the region's transformation in pursuit of democracy, economic development, as well as its effects on forces born and bred in the region – Islamic fundamentalism, global Jihad and extreme modes of nationalism. It highlights the fact that regimes and the public now recognize unprecedented challenge of urgency for change, which touches almost every area of life in the Middle East.

Specialization in Counter-Terrorism and Homeland Security

Head of specialization: Dr. Boaz Ganor

About the Program

The M.A. program with specialization in Counter-Terrorism and Homeland Security offered by the Lauder School of Government, Diplomacy and Strategy, in collaboration with the International Institute for Counter-Terrorism (ICT) at IDC Herzliya, is a cutting edge M.A. program which combines academic study, simulations and workshops, which offer special tools for critical thinking in this field. The courses provide concentrated, in-depth exposure to the phenomenon of modern terrorism and its characteristics, modus operandi, scope and dissemination throughout the world. Students will obtain an understanding of the challenge this phenomenon presents to decision-makers, security establishments, first responders, legal systems and the business sector, based on the experience Israel has accumulated in the field.

Cyber-Terrorism

The accelerated development of computer technology, in particular – the power of computers, the extensive and deep entrenchment of the Internet worldwide, and the broad accessibility of computers and the Internet – has rendered “cyberspace” a new and dangerous arena of activity for states, terrorist organizations and networks, and individuals with radical ideological or religious motivations. Security forces throughout the world have become convinced that cyberspace is fast becoming the main military and civil arena of such countries and organizations. The implications of a strategic cyber attack threaten to devastate civil society, causing unprecedented human injury and damage to critical national infrastructure.

We therefore opened, in cooperation with the Efi Arazi School of Computer Science, a graduate-level sub-specialization dealing with cyber-terrorism. The aim of the specialization is to introduce students in the field of cyber-terrorism, and expose them to the characteristics, modus operandi and scope of the cyber-terrorist threat. The courses will provide a brief overview of the relevant technical aspects of cyber terrorism, the motivation and capabilities of various terrorist organizations, and discuss mitigation plans against these threats.
